Nil

## **4.CONFIRMATION OF PREVIOUS MINUTES**

### **3.1 CONFIRMATION OF PREVIOUS MINUTES OF THE AUDIT AND RISK MANAGEMENT COMMITTEE MEETING**

**Responsible Officer:** CEO  
**Date:** 10 September 2026  
**Attachment:** 3.1A

Minutes of the Audit and Risk Management Committee meeting which was held on 6 March 2025 were circulated previously under a separate cover and are to be found [at this link](#).

Moved: Cr P. Kelly

Seconded: Mr. P. Zhou

#### **RECOMMENDATION AND COMMITTEE RESOLUTION**

**3.1.1 The Audit and Risk Management Committee confirm the minutes of the WMRC Audit and Risk Management Committee meeting held on 6 March 2025 as a true and correct record.**

**CARRIED: 4/0**

## 5. REPORTS OF OFFICERS

### 4.1 2025 COMPLIANCE AUDIT RETURN

|                      |                                   |
|----------------------|-----------------------------------|
| Responsible Officer: | CEO                               |
| Date:                | 10 September 2026                 |
| Attachment:          | 4.1A 2025 Compliance Audit Return |

### PURPOSE

This report presents the 2025 Compliance Audit Return for consideration and referral to Council for adoption.

### BACKGROUND

Each calendar year, local governments are required to undertake a compliance audit and submit a Council-approved Compliance Audit Return (CAR) to the Department of Local Government.

The Audit, Risk and Improvement Committee is required to review the completed 2025 CAR and, in doing so, consider any recommendations it considers appropriate in relation to the return. The Council must then consider both the CAR and any recommendations made by the Committee.

Following its consideration of the Committee's recommendations, the Council must determine whether any matters raised require further action and either adopt the CAR as presented or adopt it subject to amendments.

Ordinarily, the CAR must be submitted by 31 March each year. However, the Local Government Inspector extended the submission deadline for the 2025 return to 30 September 2026, in recognition of changes to the statutory requirements subject to compliance auditing.

The 2025 CAR comprises questions relating to the prescribed statutory requirements set out in Regulation 13 of the *Local Government (Audit) Regulations 1996*. The return covers the period from 1 January to 31 December 2025.

### DETAILS

The proposed return is included at Attachment 4.1A. The on-line return pro-forma requires statements of compliance or otherwise in relation to obligations set out in Acts and Regulations as follows:

- *Local Government Act 1995*
- *Administration Regulations 1996*
- *Audit Regulations 1996*
- *\*Constitution Regulations 1998*
- *\*Elections Regulations 1997*
- *Financial Management Regulations 1996*
- *Functions and General Regulations 1996*

It should be noted that as a regional Council, provisions of those regulations with asterisks do not apply.

When considering the CAR, attention is drawn to the following points:

*Local Government Act 1995 – s5.88 – Register of Financial Interests*

The return records compliance with the requirements on the basis of the established practice of recording interests within meeting minutes. It is noted there were no financial interests in the reporting period.

*Local Government (Administration) Regulations 1996 – r19DA*

The regulation requires the plan to be reviewed each year. While the review was commenced in 2025, the actual adoption of an amended plan did not occur until May 2026.

Noting the above clarifications, the return submits all applicable requirements have been met.

## **RISK MANAGEMENT**

The CAR is a self-assessment that aids in managing the following risks as set out in the WMRC Risk Register:

Governance;

- SG5 – failure to fulfill duty
- OG4 – compliance with regulations
- OG6 – compliance risk

Financial;

- OF5 – fraud and corruption

Reputational;

- SR2 – perception of poor executive leadership
- OR8 – public criticism

## **COMMUNICATION AND CONSULTATION**

Nil

## **REPORT IMPLICATIONS**

### **Legislation and Policy Alignment**

*Local Government (Audit) Regulation 14 and 15* requires each Local Government to conduct a Compliance Audit Return for the previous calendar year and to submit it to the DLGSC by 31 March of that year unless extension is otherwise provided.

### **Business and Strategic Alignment**

Compliance with statutory requirements supports theme 6 of the [Council Plan 2026](#) as follows:

*Maintain a capable, adaptable and resilient organisation that can sustainably deliver services, manage risk and support long-term strategic objectives.*

## **Financial and Resource Implications**

Nil

## **COMMENTS**

The CAR return is recommended for adoption and forwarding to the Department of Local Government Industry Regulation and Safety.

## **VOTING REQUIREMENT**

Simple majority

Moved: Cr P. Kelly

Seconded: Cr. R. Jones

## **RESPONSIBLE OFFICER RECOMMENDATION**

**4.1.1 That the Audit, Risk and Improvement Committee recommend to Council that the draft Compliance Audit Return 2025 be adopted by Council pursuant to *Local Government (Audit) Regulations 1996 r14(6)* and submitted to the Department of Local Government, Industry Regulation and Safety by 30 September 2026.**

**CARRIED: 4/0**

## 4.2 INTEGRITY FRAMEWORK

|                      |                               |
|----------------------|-------------------------------|
| Responsible Officer: | CEO                           |
| Date:                | 10 September 2026             |
| Attachment:          | 4.2A WMRC Integrity Framework |

### PURPOSE

To present the WMRC Integrity Framework to the Audit, Risk and Improvement Committee as a consolidated statement of the organisation's integrity management arrangements.

### BACKGROUND

The WMRC is committed to maintaining high standards of integrity, accountability and ethical conduct in all aspects of its operations.

The Audit, Risk and Improvement Committee has an important role in overseeing governance, risk management, compliance and integrity matters. While WMRC has a range of policies, procedures and statutory obligations that support integrity, these arrangements have not previously been documented in a single framework.

The proposed Integrity Framework has been prepared to provide a consolidated overview of the governance structures, policies, reporting mechanisms, cultural expectations and monitoring activities that collectively support integrity across the organisation.

### DETAILS

The Integrity Framework describes the instruments, structures and cultural factors that guide how WMRC practices, manages and accounts for integrity. It also sets out respective roles and responsibilities. The Framework is organised around six key elements:

- Governance and Leadership
- Risk and Audit Oversight
- Integrity Policies
- Reporting and Accountability
- Culture and Capability
- Monitoring and Continuous Improvement

The Framework draws together existing legislative obligations, governance arrangements, policies and operational practices including:

- Codes of Conduct for Council Members, employees, volunteers and contractors;
- conflict of interest management processes;
- risk management systems aligned with AS ISO 31000:2018;
- public interest disclosure and whistleblower protections;
- audit and assurance processes;
- financial and compliance reporting obligations; and
- organisational values and behavioural expectations.

The Framework does not create any new obligations. Rather, it provides a reference document that assists Council Members, Committee Members, employees and stakeholders to understand how integrity is supported and monitored across the organisation.

The Framework will be reviewed periodically to ensure it remains current and reflects any changes to legislation, governance arrangements or organisational practices.

## RISK MANAGEMENT

The Integrity Framework supports management of the following risks contained within the WMRC Risk Register:

Governance;

SG5 – failure to fulfill duty

OG4 – compliance with regulations

OG6 – compliance risk

Financial;

OF5 – fraud and corruption

Reputational;

SR2 – perception of poor executive leadership

OR8 – public criticism

The Framework strengthens organisational integrity by clearly documenting controls, responsibilities and assurance mechanisms that mitigate governance, compliance and corruption-related risks

## COMMUNICATION AND CONSULTATION

Nil

## REPORT IMPLICATIONS

### Legislation and Policy Alignment

The Framework supports compliance with relevant provisions of the *Local Government Act 1995*, *Public Interest Disclosure Act 2003*, *Corruption, Crime and Misconduct Act 2003* and associated regulations and policies relating to governance, ethics and accountability.

### Business and Strategic Alignment

The Integrity Framework supports [Council Plan 2026](#) theme 6 as follows:

*Maintain a capable, adaptable and resilient organisation that can sustainably deliver services, manage risk and support long-term strategic objectives.*

### Financial and Resource Implications

Nil

## COMMENTS

The Integrity Framework provides a clear and accessible summary of the mechanisms through which WMRC promotes ethical behaviour, accountability and transparency. Adoption of the Framework will help strengthen governance oversight and provide a foundation for ongoing integrity monitoring and continuous improvement.

## **VOTING REQUIREMENT**

Simple majority

Moved: Cr R. Jones

Seconded: Mr. P. Zhou

### **RESPONSIBLE OFFICER RECOMMENDATION**

**4.2.1 That the Audit, Risk and Improvement Committee receive the WMRC Integrity Framework attached as Attachment 4.2A.**

**CARRIED: 4/0**

## 4.3 RISK MANAGEMENT FRAMEWORK

|                      |                                                                                                    |
|----------------------|----------------------------------------------------------------------------------------------------|
| Responsible Officer: | CEO                                                                                                |
| Date:                | 10 September 2026                                                                                  |
| Attachment:          | 4.3A Council Policy – Risk Management<br>4.3B Risk Management Plan<br>4.3C Corporate Risk Register |

### PURPOSE

To provide an overview of the WMRC Risk Management Framework and advise of the ongoing review of the Corporate Risk Register.

### BACKGROUND

The WMRC has adopted a Risk Management Policy and Risk Management Plan that establish the organisation's approach to identifying, assessing, treating and monitoring risk. The framework is aligned with AS/NZS ISO 31000:2018 and is intended to ensure that risk management is embedded across strategic, operational and project decision-making.

The Risk Management Plan was adopted by Council on 30 January 2025 and provides the structure through which risks are identified, evaluated, managed and reported. The framework is supported by a Corporate Risk Register that records strategic, operational and project risks together with their controls, treatments, ownership and review requirements.

The Risk Management Framework forms a key component of WMRC's corporate governance arrangements and supports compliance with the requirements of the *Local Government (Audit) Regulations 1996* relating to the review of risk management systems and procedures.

### DETAILS

#### Risk Framework

WMRC's Risk Management Framework comprises three interconnected components:

- Risk Management Policy;
- Risk Management Plan; and
- Corporate Risk Register.

The framework applies risk management principles across strategic, operational and project activities and requires risks to be identified, analysed, evaluated, treated, monitored and reviewed on an ongoing basis.

The Risk Management Plan establishes risk categories covering:

- strategic;
- governance;
- commercial and legal;
- financial;
- information technology;

- health and safety;
- operational;
- human resource management; and
- reputational risks.

The current Corporate Risk Register contains strategic and operational risks across each of these categories together with project-specific risk registers for major initiatives currently being undertaken by the organisation. The register identifies risk owners, existing controls, residual risk ratings and actions required to further reduce risk where appropriate.

Examples of strategic risks presently monitored include long-term planning for the Recycling Centre, governance effectiveness, financial sustainability, information security, workforce capability and organisational reputation. Current operational risks include regulatory compliance, procurement, workplace health and safety, operational continuity, cybersecurity and contractor management.

Consistent with Council policy, the organisation maintains a low appetite for risks relating to health and safety, legislative compliance and administration of finances and assets, while recognising that a higher risk appetite may be acceptable where innovation and strategic opportunities provide commensurate benefits.

### **Committee Oversight and Next Steps**

The Risk Management Policy identifies the Audit, Risk and Improvement Committee as having an important oversight role in relation to the effectiveness and appropriateness of the organisation's systems and procedures for risk management, internal control and legislative compliance. Strategic risks are intended to be periodically reviewed through the Committee.

Since adoption of the Risk Management Plan, several significant organisational initiatives have progressed, including major Recycling Centre renewal activities, infrastructure projects, information technology improvements and governance reforms. As a result, management is currently undertaking a review and refresh of the Corporate Risk Register to ensure it remains contemporary, accurately reflects the organisation's current operating environment and appropriately captures emerging strategic and operational risks.

A revised Corporate Risk Register will be presented to the Audit, Risk and Improvement Committee at coming meetings for detailed review and discussion. This will provide the Committee with an opportunity to consider risk ratings, control effectiveness, risk ownership and any proposed changes to the organisation's risk profile.

## **RISK MANAGEMENT**

This report relates directly to the management of organisational risk and supports the governance objectives established within the WMRC Risk Management Framework. Effective risk management assists the organisation to achieve its strategic objectives, maintain regulatory compliance, protect financial sustainability and safeguard organisational reputation.

The Framework strengthens organisational integrity by clearly documenting controls, responsibilities and assurance mechanisms that mitigate governance, compliance and corruption-related risks

## COMMUNICATION AND CONSULTATION

Nil

## REPORT IMPLICATIONS

### Legislation and Policy Alignment

The report supports compliance with:

- *Local Government Act 1995;*
- *Local Government (Audit) Regulations 1996;* and
- WMRC Risk Management Policy.

### Business and Strategic Alignment

The Integrity Framework supports [Council Plan 2026](#) theme 6 as follows:

*Maintain a capable, adaptable and resilient organisation that can sustainably deliver services, manage risk and support long-term strategic objectives.*

### Financial and Resource Implications

Nil. Existing resources are being utilised to maintain and review the Risk Management Framework and Corporate Risk Register

## COMMENTS

The WMRC has established a comprehensive risk management framework that aligns with contemporary risk management principles and legislative requirements. The ongoing review of the Corporate Risk Register provides an opportunity to ensure the organisation's risk profile remains current and continues to support informed decision-making and effective governance oversight.

## VOTING REQUIREMENT

Simple majority

Moved: Mr P. Zhou

Seconded: Cr. R. Jones

### RESPONSIBLE OFFICER RECOMMENDATION

**4.3.1 That the Audit, Risk and Improvement Committee receive the report on the WMRC Risk Management Framework; and note that an updated Corporate Risk Register will be presented to the Committee for progressive review in future meetings.**

**CARRIED: 4/0**

## 4.4 COMPLIANCE MANAGEMENT FRAMEWORK

|                      |                   |
|----------------------|-------------------|
| Responsible Officer: | CEO               |
| Date:                | 10 September 2026 |
| Attachment:          | Nil               |

### PURPOSE

To inform the Audit, Risk and Improvement Committee of the arrangements in place to manage statutory and regulatory compliance across the organisation.

### BACKGROUND

Compliance with legislative and regulatory obligations is a fundamental component of good governance and an important element of the organisation's risk management and integrity frameworks. Effective compliance management assists WMRC to meet its statutory obligations, maintain public confidence and reduce exposure to governance, financial and reputational risks.

To support compliance activities, WMRC maintains a comprehensive Compliance Calendar that identifies key statutory, regulatory and governance obligations applicable to the organisation and schedules actions throughout the year. The calendar is based on a template prepared by the Western Australian Local Government Association (WALGA).

### DETAILS

#### Compliance Calendar

The Compliance Calendar operates as a practical management tool that assists officers to identify, monitor and fulfil compliance obligations arising from legislation, regulations, policies and recognised governance practices.

The calendar allocates responsibilities to relevant officers and captures the timing and frequency of compliance activities, including monthly, quarterly, annual and periodic obligations. It also provides a mechanism for recording completion of compliance actions and identifying any corrective actions required where compliance issues arise.

The calendar incorporates obligations arising from a broad range of legislation and governance requirements, including:

- financial management and reporting;
- annual budget preparation and adoption;
- annual financial audit processes;
- compliance audit returns;
- risk management and internal control reviews;
- disclosures of interests and returns;
- public interest disclosure requirements;
- records management obligations;
- freedom of information requirements;
- publication of information on the organisation's website;

- procurement and tendering requirements; and
- governance and planning obligations under the Integrated Planning and Reporting Framework.

In addition to legislated obligations, the calendar includes a range of good governance and internal assurance activities such as internal audits, policy reviews, register reviews and compliance monitoring activities.

The Compliance Calendar is reviewed and updated periodically to reflect legislative amendments, changing organisational responsibilities and emerging compliance requirements. Progress against the calendar is monitored by the Leadership Group as part of normal business operations at monthly meetings.

### **Committee Oversight and Next Steps**

The Audit, Risk and Improvement Committee has a key oversight role in relation to legislative compliance and the effectiveness of the systems and procedures established to support compliance management. Regular reports provided to the Committee, including compliance audit returns, relevant policy reviews, risk management reviews and audit reports, provide assurance regarding the effectiveness of these arrangements.

The Compliance Calendar forms one of the operational tools used by management to support this assurance framework by promoting timely completion of compliance obligations and supporting effective monitoring of compliance performance.

## **RISK MANAGEMENT**

The Compliance Framework supports management of the following risks contained within the WMRC Risk Register:

#### Governance;

- SG5 – failure to fulfill duty
- OG4 – compliance with regulations
- OG6 – compliance risk

#### Financial;

- OF5 – fraud and corruption

#### Reputational;

- SR2 – perception of poor executive leadership
- OR8 – public criticism

The calendar provides a structured mechanism for identifying and managing statutory compliance obligations and reducing the likelihood of inadvertent non-compliance

## **COMMUNICATION AND CONSULTATION**

The Compliance Calendar is maintained by management and incorporates guidance from relevant legislation, government agencies and local government sector resources. Responsibility for individual compliance tasks is allocated to officers according to their functional responsibilities.

## REPORT IMPLICATIONS

### Legislation and Policy Alignment

The Compliance Calendar supports compliance with obligations arising under the *Local Government Act 1995*, associated regulations and other legislation applicable to the operations of WMRC.

### Business and Strategic Alignment

The Integrity Framework supports [Council Plan 2026](#) theme 6 as follows:

*Maintain a capable, adaptable and resilient organisation that can sustainably deliver services, manage risk and support long-term strategic objectives.*

### Financial and Resource Implications

Nil.

## COMMENTS

WMRC has implemented a structured and proactive approach to compliance management through the use of a comprehensive Compliance Calendar. The calendar provides a practical mechanism for coordinating compliance activities, assigning accountability and monitoring performance across a broad range of statutory and governance obligations. The calendar supports the organisation's commitment to sound governance, transparency and continuous improvement.

## VOTING REQUIREMENT

Simple majority

Moved: Cr P. Kelly

Seconded: Cr. R. Jones

### RESPONSIBLE OFFICER RECOMMENDATION

**4.4.1 That the Audit, Risk and Improvement Committee receive the report on the WMRC compliance management arrangements and note the use of a Compliance Calendar to support the organisation's legislative and governance obligations.**

## **9.NEXT MEETING**

Thursday 29 October 2026, commencing at 5pm

# 2025 Compliance Audit Return

**Local Government Authority:** The Western Metropolitan Regional Council

## ***Local Government Act 1995***

---

### **s. 2.29**

Has every person elected or appointed to a mayor, president, deputy, or councillor role made the required declaration in the prescribed form before a prescribed person, prior to acting in the office?

**Response:** Yes

**Comments:** Declarations made in each instance prior to acting in office.

### **s. 3.16**

Has the local government reviewed local laws, which have not been reviewed in the previous 8 years, to ensure compliance with Schedule 9.3, Clause 65?

**Response:** N/A

**Comments:** The WMRC has one local law being the Local Law Standing Orders. This was published in the Government Gazette on 18 October 2019, being less than 8 years prior.

### **s.3.57**

Subject to Local Government (Functions and General) Regulations 1996, regulation 11(2), did the local government invite tenders for all contracts for the supply of goods or services where the consideration under the contract was, or was expected to be, worth more than the consideration stated in regulation 11(1) of the Regulations?

**Response:** Yes

### **s. 3.58(3)**

Where the local government disposed of property other than by public auction or tender, did it dispose of the property in accordance with section 3.58(3) of the Local Government Act 1995 (unless section 3.58(5) applies)?

**Response:** N/A

### **s. 3.58(4)**

Where the local government disposed of property under section 3.58(3) of the Local Government Act 1995, did it provide details, as prescribed by section 3.58(4) of the Act, in the required local public notice for each disposal of property?

**Response:** N/A

**s. 3.59(2)(a)**

Has the local government prepared a business plan for each major trading undertaking that was not exempt in 2025?

**Response:** N/A

**s. 3.59(2)(b)**

Has the local government prepared a business plan for each major land transaction that was not exempt in 2025?

**Response:** N/A

**s. 3.59(2)(c)**

Has the local government prepared a business plan before entering into each land transaction that was preparatory to entry into a major land transaction in 2025?

**Response:** N/A

**s. 3.59(4)**

Has the local government complied with public notice and publishing requirements for each proposal to commence a major trading undertaking or enter into a major land transaction or a land transaction that is preparatory to a major land transaction for 2024?

**Response:** N/A

**s. 3.59(5)**

During 2025, did the council resolve to proceed with each major land transaction or trading undertaking by absolute majority?

**Response:** N/A

**s. 5.16 (1)**

Were all delegations to committees resolved by absolute majority?

**Response:** Yes

**Comments:** Resolution 10.7.1 of 27 March 2025 refers.

**s. 5.16 (2)**

Were all delegations to committees in writing?

**Response:** Yes

**s. 5.17**

Were all delegations to committees within the limits specified in section 5.17 of the Local Government Act 1995?

**Response:** Yes

**s. 5.18**

Were all delegations to committees recorded in a register of delegations?

**Response:** Yes

**s. 5.36(4) and s. 5.37(3)**

Were all CEO and/or senior employee vacancies advertised in accordance with Local Government (Administration) Regulations 1996, regulation 18A?

**Response:** N/A

**s. 5.37(2)**

Did the CEO inform council of each proposal to employ or dismiss senior employee?

**Response:** N/A

Where council rejected a CEO's recommendation to employ or dismiss a senior employee, did it inform the CEO of the reasons for doing so?

**Response:** N/A

**s. 5.39B**

Has the local government adopted and maintained model standards that incorporate the prescribed model standards within required timeframes (including amendments), ensured adoption by absolute majority, published an up-to-date version on its official website, and avoided including any inconsistent additional provisions?

**Response:** Yes

**s. 5.42**

Were all delegations to the CEO resolved by an absolute majority?

**Response:** Yes

**Comments:** Resolution 10.7.1 of 27 March 2025 refers.

Were all delegations to the CEO in writing?

**Response:** Yes

**s. 5.43**

Did the powers and duties delegated to the CEO exclude those listed in section 5.43 of the Local Government Act 1995?

**Response:** Yes

**s. 5.44(2)**

Were all employees delegated authority by the CEO under Section 5.44(1), issued with a written instrument of delegation?

**Response:** Yes

**s. 5.45(1)(b)**

Were all decisions by the Council to amend or revoke a delegation made by absolute majority?

**Response:** N/A

**s. 5.46**

Has the CEO kept a register of all delegations made under Division 4 of the Act to the CEO and to employees?

**Response:** Yes

**Comments:** Item 10.7 of 27 March 2025 records the review.

Were all delegations made under Division 4 of the Act reviewed by the delegator at least once during the 2024/2025 financial year?

**Response:** Yes

Did all persons exercising a delegated power or duty under the Act keep, on all occasions, a written record in accordance with Local Government (Administration) Regulations 1996, regulation 19?

**Response:** Yes

**s. 5.50**

If the local government paid a finishing employee an amount in addition to their entitlement, did the local government follow a policy it had adopted and published on its website outlining the circumstances in relation to payments made to terminated employees?

**Response:** N/A

If the local government made a payment to a finishing employee that is more than the amount set out in the policy, was local public notice given?

**Response:** N/A

**s. 5.51A**

Has the CEO prepared and implemented a code of conduct to be observed by employees of the local government?

**Response:** Yes

Has the CEO published an up-to-date version of the code of conduct for employees on the local government's website?

**Response:** Yes

**s. 5.67**

Where a council member disclosed an interest in a matter and did not have participation approval under sections 5.68 or 5.69 of the Local Government Act 1995, did the council member ensure that they did not remain present to participate in discussion or decision making relating to the matter?

**Response:** N/A

**Comments:** A declaration of impartiality only was declared at meeting of 22 May 2025.

**s. 5.68(2)**

Were all decisions regarding participation approval in relation to Section 5.68(2), including the extent of participation allowed and, where relevant, the information required by the Local Government

(Administration) Regulations 1996 regulation 21A, recorded in the minutes of the relevant council or committee meeting?

**Response:** N/A

**s. 5.69(5)**

Were all decisions regarding participation approval in relation to Section 5.69(5), including the extent of participation allowed recorded in the minutes of the relevant council or committee meeting?

**Response:** N/A

**s. 5.70**

Where an employee had an interest in any matter in respect of which the employee provided advice or a report directly to council or a committee, did that person disclose the nature and extent of that interest when giving the advice or report?

**Response:** Yes

**s. 5.71B(5) and (7)**

Where council applied to the Minister to allow the CEO to provide advice or a report to which a disclosure under section 5.71A(1) of the Local Government Act 1995 relates, did the application include details of the nature of the interest disclosed and any other information required by the Minister for the purposes of the application?

**Response:** N/A

Was any decision made by the Minister under section 5.71B(6) of the Local Government Act 1995, recorded in the minutes of the council meeting at which the decision was considered?

**Response:** N/A

**s. 5.73**

Were disclosures under sections 5.65, 5.70 or 5.71A(3) of the Local Government Act 1995 recorded in the minutes of the meeting at which the disclosures were made?

**Response:** Yes

**Comments:** Minutes of 31 July 2025 refer.

**s. 5.75**

Was a primary return in the prescribed form lodged by all relevant persons within three months of their start day?

**Response:** Yes

**s. 5.76**

Was an annual return in the prescribed form lodged by all relevant persons by 31 August 2025?

**Response:** Yes

**s. 5.77**

On receipt of a primary or annual return, did the CEO, or the Mayor/President, as the case may be, give written acknowledgment of having received the return?

**Response:** Yes

**s. 5.88**

Did the CEO keep a register of financial interests which contained the returns lodged under sections 5.75 and 5.76 of the Local Government Act 1995?

**Response:** Yes

**Comments:** Recorded through Council minutes.

Did the CEO keep a register of financial interests which contained a record of disclosures made under sections 5.65, 5.70, 5.71 and 5.71A of the Local Government Act 1995, in the form prescribed in the Local Government (Administration) Regulations 1996, regulation 28?

**Response:** Yes

**Comments:** As per method above.

After a person ceased to be a person required to lodge a return under sections 5.75 and 5.76 of the Local Government Act 1995, did the CEO remove from the register all returns relating to that person?

**Response:** N/A

Have all returns removed from the register in accordance with section 5.88(3) of the Local Government Act 1995 been kept for a period of at least five years after the person who lodged the return(s) ceased to be a person required to lodge a return?

**Response:** Yes

**s. 5.89A**

Did the CEO keep a register of gifts which contained a record of disclosures made under sections 5.87A and 5.87B of the Local Government Act 1995, in the form prescribed in the Local Government (Administration) Regulations 1996, regulation 28A?

**Response:** Yes

Did the CEO publish an up-to-date version of the gift register on the local government's website?

**Response:** Yes

**s. 5.90A**

Did the local government prepare, adopt by absolute majority and publish an up-to-date version on the local government's website, a policy dealing with the attendance of council members and the CEO at events?

**Response:** Yes

**s. 5.94**

Does the local government have information available for members of the public to inspect, free of charge as prescribed under section 5.94 and Admin Reg 29, except where restricted under this section?

**Response:** Yes

**s. 5.96**

Where a person is entitled to inspect information under this Division, can the local government confirm that copies are available and that the price at which it sells copies does not exceed the cost of providing them, (unless prescribed otherwise)?

**Response:** Yes

**s. 5.96A**

Did the CEO publish information on the local government's website in accordance with sections 5.96A(1), (2), (3), and (4) of the Local Government Act 1995?

**Response:** Yes

**s. 5.104**

Did the local government prepare and adopt, by absolute majority, a code of conduct to be observed by council members, committee members and candidates that incorporates the model code of conduct?

**Response:** Yes

Did the local government adopt additional requirements in addition to the model code of conduct?

**Response:** No

**Comments:** The Code is consistent with the model set out in Regulations.

Has the CEO published an up-to-date version of the code of conduct for council members, committee members and candidates on the local government's website?

**Response:** Yes

**s. 5.128**

Did the local government prepare and adopt (by absolute majority) a policy in relation to the continuing professional development of council members?

**Response:** Yes

**s. 7.12A(3), (4) and (5)**

Where the local government determined that matters raised in the auditor's report prepared under section 7.9(1) of the Local Government Act 1995 required action to be taken, did the local government ensure that appropriate action was undertaken in respect of those matters?

**Response:** Yes

Where matters identified as significant were reported in the auditor's report, did the local government prepare a report that stated what action the local government had taken or intended to take with respect to each of those matters?

**Response:** Yes

Was a copy of the report given to the Minister within three months of the audit report being received by the local government?

**Response:** Yes

Within 14 days after the local government gave a report to the Minister under section 7.12A(4)(b) of the Local Government Act 1995, did the CEO publish a copy of the report on the local government's official website?

**Response:** Yes

## ***Local Government (Administration) Regulations 1996***

---

### **r. 18F**

Were the remuneration and other benefits paid to a CEO on appointment the same remuneration and benefits advertised for the position under section 5.36(4) of the Local Government Act 1995?

**Response:** N/A

### **r. 19AB**

Does the code of conduct contain the requirement that a local government employee (not including the CEO) must not accept a prohibited gift from an associated person?

**Response:** Yes

### **r. 19AC**

Does the local government's code of conduct include requirements for the recording, storing, disclosure, and use of information relating to gifts accepted by local government employees (excluding the CEO) from associated persons, in accordance with regulatory requirements?

**Response:** Yes

### **r. 19AE**

Does the local government's code of conduct include requirements addressing employee behaviour in the performance of duties, interactions with others, use and disclosure of information, use of local government resources and finances, the keeping of records, and the reporting and management of suspected breaches and misconduct, in accordance with regulatory requirements?

**Response:** Yes

### **r. 19B**

Did the local government include in its annual report all information required under section 5.53(2)(g) and (i) and regulation 3A(2), including number of employee's in salary bands over \$130,000, remuneration and allowances paid, ordered payments, CEO remuneration, council member meeting attendance, available demographic information about council members, and details of any modifications to the strategic community plan or significant modifications to the corporate business plan?

**Response:** Yes

### **r. 19C**

Has the local government adopted by absolute majority a strategic community plan?

**Response:** Yes

**Comments:** A major review was undertaken during the reporting period, with an amended Plan adopted on 28 May 2026 (resolution 10.3.1 refers). The date below reflects the date of the preceding Plan adoption. The on-line system does not allow entry of the 2026 date.

Adoption date or the date of the most recent review: 30/11/2023

**r. 19DA**

Has the local government reviewed its corporate business plan in accordance with Admin Regulation 19DA(4)?

**Response:** No

**Comments:** A major review was undertaken during the reporting period, with an amended Plan adopted by Council resolution on 28 May 2026 (resolution 10.3.2 refers).

Does the corporate business plan comply with the requirements of Local Government (Administration) Regulations 1996 19DA(2) & (3)?

**Response:** Yes

**r. 22**

No response required. This is covered by s5.75.

**r. 23**

No response required. This is covered by s5.76.

**r. 28**

No response required. This is covered by s5.88(1).

**r. 28A**

No response required. This is covered by s5.89A(1).

**r. 29**

No response required. This is covered by s5.94.

**r. 29C**

Does the local government publish all prescribed information on its official website— including up-to-date policies, required details of council member and employee returns, council member fees and allowances, and relevant public notices—within the specified timeframes and in accordance with legislative requirements?

**Response:** Yes

**r. 35**

Has every local government council member completed and passed the Council Member Essentials course, consisting of the five required modules and delivered by an approved provider, within 12 months of being elected?

**Response:** N/A

**Comments:** This requirement is overseen by Member Council administrations.

**r. 36**

Does the local government appropriately identify and document council members who are exempt from the training requirements under section 5.126(1), including verifying that the member:

- has completed an approved course within the specified 5-year period prior to election, or
- completed the LGASS00002 Elected Member Skill Set before 1 July 2019 within the relevant timeframe, or
- qualifies for the transitional exemption applicable to council members in office at the commencement of the 2019 regulatory amendments?

**Response:** N/A

**Comments:** This requirement is overseen by Member Council administrations.

## ***Local Government (Audit) Regulations 1996***

---

### **r. 10**

Was the auditor's report for the financial year ending 30 June 2025 received by the local government within 30 days of completion of the audit?

**Response:** Yes

### **r. 17**

Did the CEO review the appropriateness and effectiveness of the local government's systems and procedures in relation to risk management, internal control and legislative compliance in accordance with Local Government (Audit) Regulations 1996 regulation 17 within the three financial years prior to 31 December 2025?

**Response:** Yes

**Comments:** Resolution 15.2.1 of 21 March 2024, not 2025 as stated below. The on-line field would not accept the 2024 date entry, even though this is a compliant date.

Date of council's resolution to accept the report: 21/03/2025

## ***Local Government (Constitution) Regulations 1998***

---

### **r. 11FA**

Did the CEO provide the Minister a report as to the result of the election within 14 days of the declaration and in the form of Form 20 of the Local Government (Elections) Regulations 1997, modified as necessary?

**Response:** N/A

### **r. 13**

Were all required oaths, affirmations and declarations under section 2.42 (in relation to Commissioners) made in the correct form (Form 8), before the appropriate authorised person?

**Response:** N/A

## ***Local Government (Elections) Regulations 1997***

---

### **r. 30G**

Did the CEO establish and maintain an electoral gift register and ensure that all disclosure of gifts forms completed by candidates and donors and received by the CEO were placed on the electoral gift register at the time of receipt by the CEO and in a manner that clearly identifies and distinguishes the forms relating to each candidate in accordance with regulations 30G(1) and 30G(2) of the Local Government (Elections) Regulations 1997?

**Response:** N/A

Did the CEO remove any disclosure of gifts forms relating to an unsuccessful candidate, or a successful candidate that completed their term of office, from the electoral gift register, and retain those forms separately for a period of at least two years in accordance with regulation 30G(4) of the Local Government (Elections) Regulations 1997?

**Response:** N/A

Did the CEO publish an up-to-date version of the electoral gift register on the local government's official website in accordance with regulation 30G(5) of the Local Government (Elections) Regulations 1997?

**Response:** N/A

## ***Local Government (Financial Management) Regulations 1996***

---

### **r. 5**

Has the CEO ensured efficient systems and procedures are established under provisions set out in Financial Management Regulations 5(1)(a) to (g)?

**Response:** Yes

### **r. 6**

Has the local government ensured that any employee delegated responsibility for day-to-day accounting or financial management operations is not also delegated the responsibility for conducting internal audits, reviewing their own duties, or for managing, directing or supervising someone who carries out these functions?

**Response:** Yes

### **r. 7**

Did the local government ensure it has regard to the needs of the inhabitants of the district as a whole and not keep separate ward accounts or determine expenditure on the basis of revenue from a ward?

**Response:** N/A

### **r. 8**

Does the local government maintain separate accounts with a bank or other financial institution for money to be held in the municipal fund, trust fund and for reserve account purposes?

**Response:** Yes

### **r. 9**

Did the local government keep separate financial records for each trading undertaking and each major land transaction?

**Response:** N/A

### **r. 11**

Has the local government developed procedures for the authorisation of, and the payment of, accounts in accordance with Local Government (Financial Management) Regulations 11(1), (2) and (3)?

**Response:** Yes

### **r. 12**

Were payments made from the municipal fund or trust fund made by the CEO under a delegated authority or authorised, in accordance with regulation 13(2), in advance by a council resolution?

**Response:** Yes

**r. 13**

Can the local government confirm that, where the CEO has been delegated authority to make payments from the municipal or trust fund, the CEO prepared accurate monthly lists that are presented at the next ordinary council meeting and recorded in the minutes?

- includes the payee's name, payment amount, payment date, and sufficient information to identify each transaction where payments have already been made; or
- includes the payee's name, payment amount, sufficient information to identify each transaction, and the date of the council meeting (to which the list will be presented) for accounts requiring council approval.

**Response:** Yes

**r. 13A**

Did the local government prepare a list each month of all payments made using employee-authorised credit, debit or other purchasing cards, and include the payee's name, the amount of the payment, the date of the payment, sufficient information to identify the payment, and present the list at the next ordinary council meeting (and record in the minutes)?

**Response:** Yes

**r. 19**

Has the local government established and documented internal control procedures to enable identification of the nature and location of all investments and any related transactions?

**Response:** Yes

**r. 19C**

Has the local government ensured that all investments made under section 6.14(1) comply with statutory restrictions set out in Financial Management Reg. 19C?

**Response:** Yes

## ***Local Government (Functions and General) Regulations 1996***

---

### **r. 7**

No response required. This is covered by s3.59(2).

### **r. 9**

No response required. This is covered by s3.59(2).

### **r. 10**

No response required. This is covered by s3.59(2).

### **r. 11A**

Did the local government comply with its current purchasing policy, adopted under the Local Government (Functions and General) Regulations 1996, regulations 11A(1) and (3) in relation to the supply of goods or services where the consideration under the contract was, or was expected to be, \$250,000 or less or worth \$250,000 or less?

**Response:** Yes

### **r. 11**

No response required. This is covered by s3.57.

### **r. 12**

Did the local government consider the implications of Local Government (Functions and General) Regulations 1996, Regulation 12 when deciding to enter into multiple contracts rather than a single contract?

**Response:** Yes

### **r. 14(1), (3) and (5)**

If the local government sought to vary the information supplied to tenderers, was every reasonable step taken to give each person who sought copies of the tender documents, or each acceptable tenderer notice of the variation?

**Response:** Yes

### **r. 15**

Did the local government's procedure for receiving and opening tenders comply with the requirements of Local Government (Functions and General) Regulations 1996, Regulation 15 and 16?

**Response:** Yes

**r. 16**

No response required. This is covered by r. 15.

**r. 17**

Did the information recorded in the local government's tender register comply with the requirements of the Local Government (Functions and General) Regulations 1996, Regulation 17 and did the CEO make the tenders register available for public inspection and publish it on the local government's official website?

**Response:** Yes

**r. 18(1) and (4)**

Did the local government reject any tenders that were not submitted at the place, and within the time, specified in the invitation to tender?

**Response:** Yes

Were all tenders that were not rejected assessed by the local government via a written evaluation of the extent to which each tender satisfies the criteria for deciding which tender to accept?

**Response:** Yes

**r. 19**

Did the CEO give each tenderer written notice containing particulars of the successful tender or advising that no tender was accepted?

**Response:** Yes

**r. 21**

Does the local government's advertising and expression of interest processes for limiting who can tender comply with the requirements of the Local Government (Functions and General) Regulations 1996, Regulations 21 and 22?

**Response:** N/A

**r. 22**

No response required. This is covered by r. 21.

**r. 23**

Did the local government reject any expressions of interest that were not submitted at the place, and within the time, specified in the notice or that failed to comply with any other requirement specified in the notice?

**Response:** N/A

Were all expressions of interest that were not rejected under the Local Government (Functions and General) Regulations 1996, Regulation 23(1) & (2) assessed by the local government? Did the CEO list each person as an acceptable tenderer?

**Response:** N/A

**r. 24**

Did the CEO give each person who submitted an expression of interest a notice in writing of the outcome in accordance with Local Government (Functions and General) Regulations 1996, Regulation 24?

**Response:** N/A

**r. 24AD(2), (4) and (6)**

Did the local government invite applicants for a panel of pre-qualified suppliers via Statewide public notice in accordance with Local Government (Functions & General) Regulations 1996 regulations 24AD(4) and 24AE?

**Response:** No

**Comments:** No invitations were extended during the reporting period.

If the local government sought to vary the information supplied to the panel, was every reasonable step taken to give each person who sought detailed information about the proposed panel or each person who submitted an application notice of the variation?

**Response:** N/A

**r. 24AE**

No response required. This is covered by r. 24AD(2), (4) and (6).

**r. 24AF**

No response required. This is covered by r. 24AD(2), (4) and (6).

**r. 24AG**

Did the information recorded in the local government's tender register about panels of pre-qualified suppliers comply with the requirements of Local Government (Functions and General) Regulations 1996, Regulation 24AG?

**Response:** N/A

**r. 24AH(1) and (3)**

Did the local government reject any applications to join a panel of prequalified suppliers that were not submitted at the place, and within the time, specified in the invitation for applications?

**Response:** N/A

Were all applications that were not rejected assessed by the local government via a written evaluation of the extent to which each application satisfies the criteria for deciding which application to accept?

**Response:** N/A

**r. 24AI**

Did the CEO send each applicant written notice advising them of the outcome of their application?

**Response:** N/A

**r. 24E**

Where the local government gave regional price preference, did the local government comply with the requirements of Local Government (Functions and General) Regulations 1996, Regulation 24E and 24F?

**Response:** N/A

**r. 24F**

No response required. This is covered by r. 24E.

I certify this is a true and accurate copy of the 2025 Compliance Audit Return, as adopted by Council at the meeting of \_\_\_\_\_ 2026.

# 1. Executive Summary

The upcoming expiry of WMRC's FOGO processing contract provides an opportunity to review how organic waste can deliver greater environmental, economic and community value. While the current composting-based model is proven, reliable and consistent with government policy, increasing FOGO volumes, contamination challenges, emerging technologies and evolving sustainability objectives support consideration of alternative processing pathways.

This paper examines a range of options, including advanced composting, anaerobic digestion, hybrid processing systems and emerging thermal technologies. While composting remains the benchmark technology due to its maturity and low risk, alternative approaches may offer additional benefits through renewable energy generation, emissions reduction, carbon sequestration and improved circular economy outcomes.

The review also identifies an opportunity to consider splitting the FOGO stream according to contamination levels or material characteristics. A differentiated processing approach could allow cleaner material to be directed to higher-value recovery pathways, while more contaminated material is managed through technologies better able to tolerate contamination. Such an approach could improve overall resource recovery outcomes while creating stronger incentives for feedstock quality.

The review suggests that WMRC should maintain flexibility and avoid long-term technology lock-in. Future decisions should consider environmental, economic and strategic outcomes alongside cost, including greenhouse gas reduction, product quality, contamination sensitivity, regulatory certainty and market demand.

To inform procurement, a market engagement process through an Expression of Interest could be appropriate to better understand available technologies and contractual models. This would support the development of a technology-neutral procurement approach focused on achieving the best long-term outcomes for member councils and their communities.

## 2. Introduction

WMRC's current contract for the processing of Food Organics and Garden Organics (FOGO) material is due to expire in mid-2027. While the existing arrangements have provided a reliable and effective processing solution, the approaching contract expiry requires consideration of the most appropriate processing services and contractual arrangements for the period beyond 2027.

The purpose of this discussion paper is to inform that decision-making process and the design of the tender documentation.

Determining the most appropriate future approach requires more than a simple comparison of processing costs. Decisions regarding FOGO processing have implications for environmental outcomes, resource recovery performance, greenhouse gas emissions, circular economy objectives, operational risk and long-term financial sustainability. Accordingly, it is necessary to understand the criteria that should be used to assess alternative processing pathways and procurement approaches.

This paper therefore examines the comparative environmental benefits, economics and relative costs of established and emerging FOGO processing technologies. It also considers broader strategic factors including contamination management, regulatory alignment, market maturity, community expectations, risk and procurement flexibility. By providing this information, the paper is intended to support an evidence-based assessment of the options available to WMRC as it plans for future FOGO processing arrangements beyond the expiry of the current contract.

Processing technology is not the only possible variable in the contract design. Others may include contract length, and contamination management.

The overarching objective is to ensure that future decisions deliver the best long-term balance of environmental, economic and social outcomes for member councils and their residents.

## 3. Strategic Context

A review of FOGO (Food Organics and Garden Organics) processing arrangements is consistent with several objectives contained within the Corporate Plan and broader government policy settings. Collectively, these strategic drivers support ongoing assessment of processing options to ensure recovered organic materials achieve the highest environmental, economic and community value outcomes.

## WMRC Corporate Plan Alignment

The proposed review directly supports a number of Corporate Plan actions relating to resource recovery, market development and policy leadership.

### *Resource Recovery and Processing*

- 2.2.1 Review and optimise collection, sorting and processing systems to improve material recovery and reduce residual waste.
- 2.3.2 Identify opportunities for processing technologies that improve material quality, recovery efficiency and market readiness.
- 2.3.3 Assess barriers and enablers for private sector investment in materials processing.

These actions recognise the importance of continually evaluating processing systems and emerging technologies to maximise resource recovery outcomes and improve long-term system efficiency.

### *Market Development*

- 2.4.2 Advocate for improved specifications and consistency to increase recovered material uptake.
- 2.4.3 Document material flows to demonstrate environmental and economic value.

A review of FOGO processing pathways can provide greater understanding of material flows, product quality and end-market opportunities, helping to strengthen the value proposition for recovered organics.

### *Policy Leadership*

- 4.1.2 Advocate for regulatory reforms supporting recovery and circular economy outcomes.
- 4.1.3 Provide evidence-based submissions and position papers on waste and circular economy policy.

Assessment of alternative processing pathways can inform future policy positions and provide evidence to support industry and government decision-making.

## Local Government Policy Frameworks

Many local government policy frameworks position waste management within broader sustainability frameworks that include greenhouse gas reduction targets and carbon management objectives as well as waste reduction and waste reduction objectives. These are increasingly driven by community wishes. For WMRC's current FOGO customer base these are summarised below:

| <b>Local Government</b>          | <b>FOGO Status</b>       | <b>Key Policy Objectives</b>                                                                                | <b>Notable Features</b>                                                                                                               |
|----------------------------------|--------------------------|-------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| <b>City of Subiaco</b>           | Implemented May 2023     | Divert organics from landfill, reduce emissions, support State waste targets                                | Integrated with Waste Plan 2020-2025 and sustainability objectives<br><br>Progressive FOGO rollout from houses to strata developments |
| <b>Town of Cottesloe</b>         | Implemented June 2022    | Landfill diversion, compost production, emissions reduction                                                 | First western suburbs council to adopt FOGO                                                                                           |
| <b>Town of Mosman Park</b>       | Implemented August 2023  | Increase resource recovery, achieve 70% diversion target, align with Waste Plan and Sustainability Strategy | Progressive FOGO rollout from houses to strata developments                                                                           |
| <b>Shire of Peppermint Grove</b> | Implemented May 2025     | Landfill diversion, compost production, improved recovery rates                                             | Retains weekly residual bin collection                                                                                                |
| <b>City of Vincent</b>           | Implemented October 2021 | Support zero waste to landfill target, greenhouse gas reduction                                             | Strong behavioural change and resident education program; staged rollout to apartments                                                |
| <b>Town of Victoria Park</b>     | Implemented 2025         | Waste minimisation, climate action, net-zero objectives                                                     | Linked to Climate Emergency Plan and landfill diversion goals                                                                         |
| <b>City of Perth</b>             | Implemented 2026         | Resource recovery, carbon reduction, State Waste Strategy compliance                                        | Strong behavioural change and resident education program. Partial rollout (houses only) to date                                       |

State and national strategy and policy frameworks include several relevant points:

## Western Australian Waste Strategy 2030

The objectives of the Western Australian Waste Avoidance and Resource Recovery Strategy 2030 (currently under review as 'Beyond WAsTe 2030'), are to transition the State toward a more circular economy through waste avoidance, increased value and

resource recovery, and reduced reliance on landfill particularly for organic waste. It aims that all local governments in the Perth and Peel regions implement 'better practice' FOGO collection systems.

The Strategy states that the government intends working with stakeholders to facilitate system readiness and improve quality of feedstock. It flags a possible future FOGO mandate.

## National Waste Policy and Action Plan 2024

The national policy targets of diverting 80% of waste from landfill and halving organic waste to landfill by 2030 are anticipated to promote the diversion of organic materials both for other beneficial purposes and to help reduce greenhouse gas emissions. It highlights the need for expanded collection services, processing capacity and market development for compost and other recovered products.

## Australia's Circular Economy Framework 2024

At the national level, policy direction is increasingly focused on retaining materials in productive use for longer, growing domestic markets for recovered resources and encouraging investment in resource recovery infrastructure.

The Circular Economy framework supports the use of advanced organic processing technologies, particularly composting and anaerobic digestion, to produce high-quality recycled organics from well-separated and uncontaminated organic waste streams.

## Australia's Net Zero Plan 2025

This plan presents FOGO as a methane abatement and circular economy measure focussing on diverting organic waste from landfill and channelling it to dedicated low-emissions processing. Like the Circular Economy Framework, it argues that keeping material in use longer and reducing waste lowers emissions across the economy.

This plan does discuss biomethane as an emerging renewable gas produced from organic feedstocks through anaerobic digestion.

Consequently, the selection of future FOGO processing pathways has implications extending beyond landfill diversion and waste management performance. Alternative processing technologies may be more beneficial in terms of greenhouse gas emissions, renewable energy production, carbon sequestration, nutrient recovery and broader climate outcomes. Technologies such as anaerobic digestion, renewable gas production and biochar generation may provide opportunities to complement traditional composting systems while contributing to long-term decarbonisation goals.

## Strategic Implication

Taken together, these corporate, state and national policy drivers indicate that a review of FOGO processing arrangements is both timely and strategically justified. The focus is no longer solely on diverting organic material from landfill, but on determining how

recovered organics can deliver the greatest overall value through improved resource recovery, market development, circular economy outcomes and emissions reduction.

## 4. The Current Position

### Existing Model

Under the current operating model, Food Organics and Garden Organics (FOGO) collected by member and customer councils are delivered to the WMRC's Recycling Centre, where the material is received, consolidated and prepared for bulk transport to a commercial processing facility near Gingin. At that facility, the material undergoes an open windrow composting process that converts the organic fraction of the waste stream into compost products for beneficial reuse. These arrangements are quantified for the 2025/26 financial year:

| FY2026                                                                          |                    |
|---------------------------------------------------------------------------------|--------------------|
| Metric                                                                          | Position           |
| Annual FOGO tonnes                                                              | 14,000             |
| Haulage distance                                                                | 106 km (one-way)   |
| Total handling, haulage and processing cost per tonne (Member Council gate fee) | \$149              |
| Total annual cost                                                               | \$2,090,000 ex GST |
| Contamination rate                                                              | less than 5%       |

Comparative waste stream cost (Member Council gate fee) per tonne (ex GST) for last financial year is illustrated below.

FOGO material is received from the following member and non-member local governments as follows.

| Local Government          | 2025/26 Tonnage |
|---------------------------|-----------------|
| City of Subiaco           | 2,189           |
| Town of Cottesloe         | 1,536           |
| Town of Mosman Park       | 1,690           |
| Shire of Peppermint Grove | 397             |
| City of Perth (part year) | 110             |
| City of Vincent           | 4,828           |
| Town of Victoria Park     | 3,224           |

## Strengths

The existing processing arrangement is based on a proven, low technology, and mature technology that is widely used throughout Australia and internationally. Composting focusses on material rather than energy recovery and at its best forms a valuable illustration of beneficial material reuse: food waste is used locally to promote food growth. Open windrow composting as an organic waste treatment method is well understood by regulators, local governments and the broader community, and benefits from established end markets for the resulting products. The current model carries relatively low technical and operational risk, as the technology is well tested and supported by experienced processing contractors. In addition, the arrangement aligns closely with current Western Australian waste and resource recovery policy settings, providing a high degree of regulatory certainty and market acceptance.

## Limitations

While the current model has performed effectively, it also presents several limitations that warrant consideration as the existing contract approaches expiry. The transport of material to a processing facility over 100km away adds cost, emissions and other transport-related risks. Under licencing constraints, the facility needs to minimise the number of sensitive receptors; in essence it must be situated away from residential areas. Once onsite the material processing requirements include manual decontamination, shredding, turning, time, and testing to remove or reduce physical, chemical and biological contaminants.

Compost derived from FOGO forms only a proportion of the input streams to create marketable and Australian Standard compliant compost and soil products. Others include more predictable and local agricultural wastes which are not subject to the same number of contamination pathways.

As a result, the market value of FOGO-derived compost products is constrained by factors including contamination, market confidence, and risk aversion by potential high-volume users. In turn this is constraining processors' ability to expand and potentially leading to a period of oversupply of FOGO-derived input to processors.

For clarity, clean FOGO products have high potential for application to agricultural land; our soils are amongst the most depleted worldwide and nationwide less than 0.1% of agricultural land would consume all compost from all households. However low prices for other soil amendments provide a cap to the amount the agricultural market will pay for fertilizers.

There is a risk that as more Local Governments roll out FOGO services to their residents, capacity limitations will increase processing prices and/or decrease the acceptable contamination level in delivered product. In turn this will drive up costs for Local Governments and their residents although low contamination levels may mitigate this. Furthermore, WMRC's current approach is broadly similar to that being adopted by many other local governments, providing limited differentiation in terms of innovation, circular economy outcomes or the extraction of additional value from the FOGO stream.

## 5. Contamination in FOGO

Although generally under 5% by weight, even this level of contamination has a considerable negative effect on market acceptance of the composted product. It is therefore a contributor to increased costs. Contamination measurement and minimisation is therefore important in processing cost minimisation.

In addition, common contaminants are generally lighter than target materials and therefore highly visible. A recent study in one inner metropolitan Perth local government illustrates this. An audit of a representative sample of household bins was carried out, and the contamination was assessed by weight and volume and according to whether it should have been in the recycling bin, the general waste bin or neither:

| <b>FOGO Bin – Material Composition</b> |                 |                 |
|----------------------------------------|-----------------|-----------------|
|                                        | <b>Weight %</b> | <b>Volume %</b> |
| FOGO                                   | 96.05           | 91.49           |
| Comingled recycling                    | 1.57            | 4.25            |
| General Waste                          | 2.28            | 4.05            |
| HHW/ e-waste/<br>miscellaneous         | 0.10            | 0.22            |

In essence, FOGO may appear to have a contamination level about twice the weight-based level.

The Australian Standard (AS4454) for compost and similar products is intended to produce clean, consistent and safe recycled organic products however needs to be updated to improve end product quality. The most recent review ended in 2024 and no updates have yet been made. Nonetheless it does prescribe strict limits for most types of contamination.

## Types

FOGO contamination can be categorised as biological, chemical or physical. In most cases, biological contamination is well-mitigated by the composting process, and the sources of chemical contamination in FOGO are generally items of physical contamination including some food packaging materials.

## Causes

Contamination may be accidental or deliberate; the recent simplification of acceptable items in the FOGO stream can be anticipated to reduce accidental contamination over time when accompanied by consistent communications to residents. Studies show that deliberate FOGO contamination is generally undertaken by a very low proportion of the community.

## Measurement

AI-enhanced studies of visual contamination in over 800,000 collections across three Australian States indicate that 63% of all bins are clean, 29% have minor contamination and only 8% are severely contaminated. This is consistent with data derived from bin-tagging.

Statistically reliable weight-based contamination measurement requires space, time and resources that are not compatible with operational requirements. A recent DWER-funded study is anticipated to cost well over \$10,000 and take 6 months to publish results.

Visual contamination can be assessed within operational requirements and can be made robust with staff training aided by AI-enhanced assessment tools. However, there is no accepted standard for converting visual contamination to weight-based contamination which is generally used for comparative and contractual purposes.

## Removal

Independent of processing technology, contamination removal methods can be classified according to a preference hierarchy as summarised below:

| Preference                                                                                                                      | Stage                     | Methods                                                                                                                            | Risks                                                                           | Cost                                                               |
|---------------------------------------------------------------------------------------------------------------------------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|--------------------------------------------------------------------|
|  <p>Most preferred</p> <p>Least preferred</p> | Prevention                | <ul style="list-style-type: none"> <li>Community education</li> <li>Community enforcement</li> <li>Collection processes</li> </ul> | Community non-compliance                                                        | ~\$9/hhold/year is the benchmark                                   |
|                                                                                                                                 | Removal before processing | <ul style="list-style-type: none"> <li>Manual removal</li> <li>Screening</li> <li>Magnets</li> </ul>                               | Contamination fragmentation<br><br>Loss of organic waste (eg adhesion when wet) | Infrastructure requirements increase with effectiveness of process |
|                                                                                                                                 | Removal during processing | <ul style="list-style-type: none"> <li>Heat and pH management</li> <li>Microbial competition</li> <li>Screening</li> </ul>         |                                                                                 |                                                                    |
|                                                                                                                                 | Removal after processing  | <ul style="list-style-type: none"> <li>Screening</li> <li>Diluting with cleaner feedstocks</li> </ul>                              |                                                                                 |                                                                    |
|                                                                                                                                 | No removal                |                                                                                                                                    | Limited market                                                                  | Cost to dispose without recovering any organic material            |

## Market impact

Although agricultural studies have shown that FOGO-derived composts products have a highly beneficial effect on soil health, crop growth and water retention, FOGO-derived products are new to the market, and the presence or suspected presence of contamination is the most commonly quoted factor limiting their use.

## 6. Alternate FOGO Processing Technologies

### Option 1 - Advanced Composting

Advanced composting represents an evolutionary rather than revolutionary approach to organics processing. Advanced composting facilities increasingly incorporate enclosed processing systems, enhanced contamination removal technologies and sophisticated quality assurance systems capable of producing more consistent and marketable compost products.

The principal advantage of this approach is that it builds upon a technology that is already well understood, widely accepted by regulators and supported by established

markets. It would involve relatively low transition risk and could attract multiple potential service providers. Given the maturity of the technology, procurement and implementation risks would also be comparatively low.

The limitation of advanced composting is that while it delivers improvements in product quality and operational performance, it is likely to increase the processing costs of FOGO processing without significantly expanding the range of benefits generated from the material stream.

## Option 2 - Anaerobic Digestion (AD)

Anaerobic digestion (AD) involves the biological decomposition of organic material within sealed, oxygen-free vessels. The process produces biogas, which can be used to generate electricity, renewable heat or renewable gas, while also producing digestate that may be further processed into soil amendment products.

Compared with conventional composting, anaerobic digestion offers the potential to extract additional value from the FOGO stream through renewable energy production. This creates opportunities to align waste management outcomes with broader decarbonisation and energy transition objectives.

From a strategic perspective, anaerobic digestion may offer stronger alignment with circular economy principles by viewing organics as both a resource and an energy source. However, these benefits must be balanced against higher capital costs, increased operational complexity and the need for reliable high feedstock volumes over extended periods. The commercial viability of such facilities improves with food organics-rich feedstocks as they break down relatively quickly under anaerobic conditions and produce higher methane yields. FOGO material is generally around 80-85% garden waste by weight and would therefore not be a preferred feedstock. Collections from multi-unit dwellings and some commercial premises yield higher food organics percentages and could be acceptable.

## Option 3 - Hybrid AD and Composting

A hybrid model combines the strengths of anaerobic digestion and composting within an integrated processing system. Food organics are typically directed to anaerobic digestion to maximise energy recovery, while digestate and green organics are subsequently composted to create valuable soil products.

This approach enables multiple forms of value recovery from the same material stream. Rather than requiring a choice between energy production and compost generation, the hybrid model seeks to optimise both outcomes. The result is improved renewable energy generation and continued production of beneficial soil amendments.

For WMRC, the hybrid model presents an opportunity to maximise environmental outcomes without abandoning the established benefits associated with compost use. However, there have been no commercially successful examples of this model in WA.

It would depend upon significant private sector investment and/or regional collaboration to achieve sufficient scale.

## Option 4 – Thermal technologies – pyrolysis and gasification

Pyrolysis and gasification involve the thermal treatment of organic materials in a no- or low-oxygen environment to create varying proportions of biochar (a stable carbon-rich product), bio-oil and synthetic fuel. These products bind carbon and nutrients in soils and provide fuels. Like AD they view organics as a resource and energy source, unlike AD they are more suited to dry woody garden organics rather than moisture-rich food organics.

From an environmental perspective, biochar is attractive because a significant proportion of carbon contained within organic material can remain locked within the final product for extended periods. This characteristic may create future opportunities associated with carbon markets and carbon credit generation.

A 2024 study in Queensland run jointly between a Local Government and a wastewater processing entity found that combined gasification and AD of FOGO and wastewater waste was not financially viable under current sectoral responsibilities. Despite promise, thermal technologies remain an emerging opportunity rather than an established mainstream solution for municipal FOGO processing. Questions remain regarding feedstock suitability, market scale, regulatory treatment and economic viability at large scale.

## Option 5 - Other Technologies

Other technologies include vermiculture, protein production and dehydration. These technologies have been used on a very small scale and have not been tested at a municipal scale. They are also generally more suitable for food waste than garden waste. Benefits include net carbon sequestration, and waste volume and weight reduction. Vermiculture produces highly beneficial solid and liquid soil amendment products, protein production produces animal feed (insect larvae) and organic fertiliser (frass), dehydration reduces haulage costs although outputs still need to be processed before use. All contribute to soil carbon; their net greenhouse gas impact varies by technology.

These technologies remain at a very early stage of commercial development and are unlikely to represent practical procurement options in the near future.

# 7. Technology Choice

Composting is a proven and widely adopted method of processing FOGO materials that delivers significant material recovery and produces a valuable soil amendment product. The WA State Waste Strategy does not contemplate alternative organic waste

processing technologies for FOGO. The marketability of the product is however contamination sensitive.

Nevertheless, the presence and ongoing development of alternate technologies highlight the importance of avoiding procurement approaches that unintentionally lock WMRC into a single recovery pathway for extended periods. A key consideration for the organisation is ensuring sufficient flexibility in contracting to adapt to future technological developments while continuing to achieve reliable and cost-effective processing outcomes in the short and medium term.

In addition, forthcoming changes at the West Metro Recycling Centre potentially provide an opportunity for a split solution for the FOGO waste stream; for example, one technology for low contamination content and another, less sensitive of higher contamination. Lower fees for clean loads and higher fees for contaminated loads would incentivise clean FOGO streams in line with preferred contamination removal approaches indicated in Section 5.

Assessment criteria for evaluating processing options may include:

- Resource recovery outcomes and overall material value.
- Greenhouse gas emissions reduction and carbon sequestration potential.
- Renewable energy generation opportunities.
- Sensitivity to contamination.
- Market maturity and demand for recovered products.
- Regulatory certainty and policy alignment.
- Operational reliability and scalability.
- Capital and lifecycle costs.
- Risk profile and long-term commercial viability.

## 8. Risk Assessment

Any evaluation of future FOGO processing pathways should be undertaken with a clear understanding of the potential risks associated with each option. While alternative technologies may present opportunities for improved resource recovery, emissions reduction or value creation, experience across the waste and resource recovery sector demonstrates that technology selection must balance innovation with operational, regulatory and commercial certainty.

A comprehensive assessment should therefore consider the following risk categories:

| <b>Risk Category</b>            | <b>Example Considerations</b>                                                                    |
|---------------------------------|--------------------------------------------------------------------------------------------------|
| Technology Risk                 | Unproven performance, operational reliability, scalability and technology maturity.              |
| Regulatory Risk                 | Changes to approvals, licensing requirements, environmental standards or policy settings.        |
| Market Risk                     | Demand uncertainty for recovered products, changing customer requirements.                       |
| Feedstock Risk                  | Variability in FOGO volumes, contamination levels and long-term supply certainty.                |
| Financial Risk                  | Capital investment requirements, operating costs, funding availability and return on investment. |
| Contract Risk                   | Contractual lock-in, limited flexibility and exposure to changing market conditions.             |
| Community and Reputational Risk | Public acceptance, odour management, transport impacts and stakeholder expectations.             |

Each processing pathway should be assessed through this risk lens alongside its potential environmental, economic and strategic benefits. The objective is not simply to identify the option with the highest theoretical value, but to determine which option or mix of options provides the most effective balance of performance, risk, flexibility and long-term resilience for WMRC and its member councils.

## 9. Community Expectations

An important consideration in evaluating future FOGO processing options is the extent to which the community is prepared to support higher-cost processing solutions where those solutions deliver demonstrable environmental benefits.

Accordingly, the assessment of future processing options should not be based solely on the lowest cost per tonne. Evaluation criteria should also balance the environmental value generated by each option, including greenhouse gas reduction, renewable energy production, carbon sequestration potential, resource recovery outcomes and alignment with local government sustainability objectives. Where higher-cost technologies can demonstrate materially improved environmental performance, these

benefits should be quantified and considered alongside financial costs within a broader value-for-money framework.

As such, future procurement assessments should seek to identify not only the direct financial costs of each processing pathway but also the environmental and social benefits generated, enabling decision-makers to determine whether any additional cost is justified by the long-term value delivered to the community and the environment.

These comments are tempered by the consideration that if a step change occurs in FOGO bin costs due to supply and demand constraints, there will be a point at which cost concerns will outweigh environmental concerns.

## 10. Market Approach

An important consideration for WMRC is how best to engage the market before developing a formal procurement specification. If the organisation proceeds directly to a traditional processing tender, there is a risk that the resulting specification may inadvertently favour existing technologies and business models. While this approach may simplify procurement, it may also limit innovation and reduce the visibility of emerging opportunities.

An alternative approach would involve a structured market engagement process prior to tender. This could include an Expression of Interest (EOI) process designed to test market capability, identify emerging technologies and better understand investment appetite. Such a process would not commit WMRC to a specific technology but would assist the organisation to understand what options may be commercially available within the relevant timeframe.

A pre-procurement market engagement process could seek information on:

- Technology solutions currently operating in Australia.
- Minimum feedstock requirements.
- Contamination sensitivity.
- Infrastructure and site requirements.
- Commercial delivery models.
- Regulatory barriers and policy requirements.
- Contract duration requirements to support investment.

The information gathered would help WMRC assess whether a conventional service contract remains the most appropriate procurement model or whether alternative arrangements should be considered.

### Potential Procurement Pathways

Following market engagement, WMRC could pursue one of several procurement models.

### Option 1: Traditional Processing Tender

WMRC specifies the service required and invites proposals from existing processors. This approach provides certainty and simplicity but may favour established technologies.

### Option 2: Technology-Neutral Tender

WMRC specifies desired outcomes, such as contamination sensitivities, greenhouse gas reduction and product quality standards, rather than prescribing a processing technology. Proponents would be free to propose solutions capable of delivering the required outcomes.

### Option 3: Two-Stage Procurement Process

WMRC undertakes an EOI process followed by a selective Request for Tender (RFT). This allows the organisation to better understand available options before seeking detailed proposals and can encourage innovation while maintaining competitive tension.

### Option 4: Partnership and Investment Model

Where the market identifies a compelling opportunity requiring long-term feedstock security or infrastructure support, WMRC could consider partnership arrangements involving land, feedstock commitments or other enabling mechanisms. This approach has the potential to deliver greater long-term value but requires careful assessment of risk, governance and financial implications.

## 11. Conclusions

The expiry of the current FOGO processing contract presents WMRC with an opportunity to consider how the region can maximise the environmental, economic and circular economy value derived from this material stream over the coming years.

While composting remains a proven and effective benchmark technology, the analysis within this paper suggests that alternative and emerging processing pathways may offer additional benefits. At the same time, technological change and evolving policy settings create a risk that a traditional technology-specific procurement process could unnecessarily constrain future opportunities.

A staged and market-led approach may be appropriate. This could involve an initial Expression of Interest process to build understanding of available technologies, commercial models, infrastructure requirements, feedstock quantity and contamination thresholds. The information gathered would then inform the development of a technology-neutral procurement strategy focused on desired outcomes rather than prescribed processing methods.

This approach would directly support several objectives within the WMRC Corporate Plan. It enables the organisation to review and optimise processing systems to improve resource recovery outcomes (Action 2.2.1), identify technologies capable of improving recovery efficiency and material value (Action 2.3.2), and better understand the barriers and enablers influencing private sector investment in processing infrastructure (Action 2.3.3). It also strengthens WMRC's ability to document material flows, evaluate environmental and economic outcomes, and contribute to evidence-based policy discussions regarding the future of organics recovery and circular economy development.

Importantly, any future assessment should extend beyond a simple comparison of processing costs. A broader value-for-money approach is consistent with WMRC's role as a regional leader in resource recovery and its commitment to delivering long-term environmental benefits on behalf of member councils and their communities.

| 4. Management Understanding of Ownership.....                                                          | 6  |
| 5. Local Government Act Considerations .....                                                           | 7  |
| 6. Rationale for an Arm's-Length Disposal Process .....                                                | 8  |
| 7. Approved Disposal Methodology .....                                                                 | 8  |
| Step 1 – Asset Identification and Cataloguing .....                                                    | 8  |
| Step 2 – Removal Sequencing.....                                                                       | 9  |
| Step 3 – Identification of Potential Purchasers OR Appointment of Disposal Agent /<br>Auctioneer ..... | 9  |
| Step 4 – Invitation to Submit Offers .....                                                             | 9  |
| Step 4A – Auction Preparation and Marketing.....                                                       | 10 |
| Step 5 – Public Market Exposure .....                                                                  | 10 |
| Step 5A – Auction Administration .....                                                                 | 10 |
| Step 6 – Offer Receipt .....                                                                           | 11 |
| Step 6A – Post-Auction Review.....                                                                     | 11 |
| Step 7 – Offer Assessment.....                                                                         | 11 |
| Step 7A – Settlement and Removal .....                                                                 | 12 |
| Step 8 – Negotiation.....                                                                              | 12 |
| Step 9 – Formal Acceptance .....                                                                       | 12 |
| Step 10 – Removal and Completion.....                                                                  | 12 |
| 8. Evaluation Framework .....                                                                          | 13 |
| 9. Probity and Conflict Management.....                                                                | 13 |
| 10. Management of Sale Proceeds .....                                                                  | 13 |
| 11. Treatment of Unsold Assets.....                                                                    | 14 |
| 12. Delegations and Direction to Staff.....                                                            | 14 |
| 13. Record Keeping Requirements.....                                                                   | 15 |
| 14. Risk Management Considerations.....                                                                | 16 |
| Council Endorsement .....                                                                              | 16 |

# 1. Executive Summary

This framework records the approved methodology for the disposal of plant, equipment, buildings and infrastructure associated with the waste processing facility and establishes the governance framework under which that disposal is to occur.

The implementation of reclamation and deconstruction works requires the removal of plant, equipment and other facility assets remaining within the project area. The authority for WMRC to undertake that activity is contained within Clause 5.2 of the Demobilisation Deed dated 13 November 2025.

Importantly, the Deed contains contractual rights which provides WMRC with authority to remove and dispose of Brockway and DiCOM assets remaining on the site but does not expressly transfer ownership of those assets to WMRC. Accordingly, WMRC is exercising a contractual right of disposal rather than disposing of assets owned by the Council.

WMRC's understanding is therefore that the disposal process does not constitute the disposal of local government property under section 3.58 of the *Local Government Act 1995*, nor the acquisition of assets under section 3.59 of the Act.

Notwithstanding that understanding, WMRC will implement a structured, transparent and market-based disposal process. WMRC may utilise suitably qualified auctioneers or disposal agents to market, promote and administer the sale of assets on WMRC's behalf. Disposal may occur by invitation to offer, public auction, online auction, negotiated sale or other market-based methodology considered appropriate.

This approach is intended to demonstrate sound governance, maximise value where reasonably practicable, maintain public confidence and provide an appropriate audit trail for future review.

This framework records the approved disposal methodology, establishes the governance arrangements applicable to disposals undertaken pursuant to the Demobilisation Deed, delegates implementation responsibilities and provides direction to officers involved in the disposal process.

## 2. Background

WMRC and Brockway DiCOM Facility Pty Ltd as trustee of the DiCOM AWT Investment (**Brockway**) were parties to a lease. Brockway owns a waste processing facility located on the formerly leased part of 60 Lemnos Street, Shenton Park.

WMRC and DiCOM AWT Operations Pty Ltd (**DiCOM**) had agreed to process waste supplied by the WMRC at the facility.

Disputes arose in relation to the above arrangements. Ultimately, the parties settled the litigation and entered into a Demobilisation Deed which required Brockway and DiCOM to remove its facility and property from the site.

The facility is not in operation and is currently progressing through the demobilisation, deconstruction and site reclamation phases.

The Demobilisation Deed entered into between the relevant parties establishes the framework governing the closure of the facility and the responsibilities of the parties following cessation of operations.

As part of the reclamation process, significant quantities of plant, process equipment, electrical systems, buildings, structural components and associated infrastructure remain on site.

In order to facilitate site clearance and subsequent reclamation works, these assets must either/or:

- be sold to third parties;
- be transferred to suitable purchasers;
- be recycled; or
- be scrapped and disposed of.

The Demobilisation Deed contains contractual rights which provides the WMRC with authority to undertake these actions.

Given the assumed value of certain items, potential purchaser interest, and the need to maintain a robust governance framework, it is appropriate that WMRC adopts a documented disposal methodology capable of withstanding future audit, governance or regulatory review.

### 3. Relevant Provisions of the Demobilisation Deed

#### **The Facility**

Clause 1.1 defines “Facility” to mean the waste processing facility and the supporting infrastructure owned by Brockway which is located on the “Site”. “Site” is defined as mean 60 Lemnos Street, Shenton Park, in Western Australia, more formerly known as Reserve 33986, being Lot 11541 on Deposited Plan 189946, being the whole of the land comprised in Record of Qualified Certificate of Crown Land Title Volume LR3044 Folio 389.

#### **WMRC’s rights**

Clause 5.2 of the Demobilisation Deed contains the contractual rights which provides WMRC with the relevant authority with respect to Brockway and DiCOM’s property.

##### Clause 5.2(d)(ii)

WMRC may, in its absolute discretion, including as to price and terms, take all steps necessary to remove and dispose of any plant or equipment or part of the Facility remaining on the site and to make good the site, including by selling, transferring or otherwise disposing of or dealing with it.

##### Clause 5.2(d)(iii)

Brockway and DiCOM agree that they will not challenge any person's right to acquire title to such items (including on the ground that the WMRC was not entitled to dispose of the items or that they did not receive notice of the intended disposal) and will not seek recovery of that property.

##### Clause 5.2(d)(iv)

Any person acquiring such items is entitled to rely on WMRC's contractual rights and is not required to investigate whether WMRC has properly exercised its contractual rights.

##### Effect of Clause 5.2

In management's view, Clause 5.2 provides WMRC with a broad contractual authority to:

- remove assets;
- sell assets;
- transfer assets;
- otherwise dispose of assets;
- negotiate disposal terms; and
- facilitate clearance of the site.

The clause further provides protection to purchasers by ensuring that title acquired through the disposal process cannot later be challenged by DiCOM or Brockway.

The clause therefore establishes a comprehensive contractual mechanism designed specifically to enable site clearance and reclamation.

### **Application of funds**

Clause 4.2 sets out how WMRC must deal with the money it receives from the disposal of Brockway and DiCOM's property. WMRC is allowed to use the money to:

- first discharge the debt which Brockway and DiCOM owes to WMRC following the settlement of the litigation; and
- pay for any costs incurred by WMRC relating to the removal and disposal of any plant or equipment or the Facility and making good of the site.

WMRC will then pay any balance remaining to Brockway or DiCOM.

## **4. Management Understanding of Ownership**

A critical consideration is the ownership status of the assets.

Management notes that the Demobilisation Deed provides WMRC with authority to dispose of any plant or equipment or part of the Facility remaining on the site which is owned by Brockway or DiCOM. However, the Demobilisation Deed does not expressly provide that ownership of those assets transfers to WMRC.

Accordingly:

- WMRC is not asserting ownership of the assets;
- WMRC is not recording the assets as Council assets;
- WMRC is not including the assets within its asset register;
- WMRC is not treating the assets as assets acquired by the Council; or
- WMRC is acting solely pursuant to the authority granted under Clause 5.2 of the Demobilisation Deed.

For governance purposes, management therefore understands that WMRC is acting as the holder of a contractual disposal right rather than as owner of the assets being disposed of.

Nothing in this framework should be interpreted as asserting ownership of the relevant assets on behalf of WMRC.

## 5. Local Government Act Considerations

### 5.1 Section 3.58 – Disposal of Property

Section 3.58 of the *Local Government Act 1995* establishes requirements relating to the disposal of property owned or leased by a local government.

Management notes:

- the assets subject to disposal are not recorded as WMRC assets;
- the assets are not leased by WMRC; and
- ownership does not transfer to WMRC under the Demobilisation Deed.

Accordingly, management's understanding is that the disposal process does not constitute disposal of property owned or leased by the local government.

Management therefore understands that section 3.58 is not applicable to the proposed disposal process.

### 5.2 Section 3.59 – Commercial Enterprises

Section 3.59 addresses circumstances in which a local government may participate in a commercial undertaking.

Management notes:

- WMRC is not acquiring the assets;
- WMRC is not establishing or operating a commercial enterprise using the assets; and
- WMRC is exercising a right conferred by the Demobilisation Deed for the purpose of facility decommissioning and site reclamation.

Management therefore understands that section 3.59 is not engaged by the proposed disposal process.

## 6. Rationale for an Arm's-Length Disposal Process

Although management understands that the statutory disposal provisions do not apply, WMRC has elected to adopt a disposal process that reflects the principles typically associated with public sector asset disposal.

This approach has been adopted because it:

- promotes transparency;
- demonstrates sound stewardship;
- maximises the opportunity to obtain fair market value;
- reduces perceived favouritism;
- supports external audit review;
- provides a defensible decision-making framework; and
- protects the reputation of WMRC.

Where advantageous, WMRC may appoint an independent auctioneer to undertake advertising, market testing, bidder management, auction administration, collection of sale proceeds and purchaser liaison.

The adopted process is designed to be commercially reasonable, transparent and auditable.

## 7. Approved Disposal Methodology

### Step 1 – Asset Identification and Cataloguing

Expert consultants have been appointed to prepare a catalogue of items considered to have potential resale value beyond simple scrap value.

The catalogue should include:

- asset description;
- visual assessment of physical condition;
- any available operating or technical manuals
- location;
- known defects;
- estimated removal requirements; and
- any identified constraints.

### Record Generated

- **DiCOM Disposal Asset Register**

## Step 2 – Removal Sequencing

A specialist consultant will determine:

- which assets can be removed immediately; and
- which assets can only be removed during subsequent deconstruction works.

### **Record Generated**

- **Asset Availability Schedule**

## Step 3 – Identification of Potential Purchasers OR Appointment of Disposal Agent / Auctioneer

A list of known potential purchasers for some or all items will be prepared by the expert Consultants. WMRC may supplement that list with additional organisations known to operate within relevant industries.

WMRC may proceed with the direct sales process described in Steps 4-10 below. Alternatively, WMRC may appoint a suitably qualified auctioneer to administer the alternative auction pathway described in Steps 4A to 7A below.

### **Direct Sale Pathway Record Generated**

- **Prospective Purchaser Register**

### **Auction Pathway Records Generated**

- **Auctioneer Appointment Agreement**
- **Auction Catalogue**
- **Marketing Report**

## Step 4 – Invitation to Submit Offers

Invitations to offer shall be issued to identified parties.

Invitations should include:

- asset details;
- closing date and time;
- inspection opportunities;
- payment requirements;
- removal obligations;
- statement of ability for WMRC to sell the assets and protection provided to potential purchasers to take ownership of the assets
- insurance requirements; and
- conditions of sale.

Invitations may be issued in tranches, according to recoverability/availability, relative values or other factors that warrant separate invitations.

Offers will need to accept the WMRC insurance requirements and condition of sale to be considered further.

#### **Record Generated**

- **Invitation to Offer Package**

### **Step 4A – Auction Preparation and Marketing**

The auctioneer shall prepare a comprehensive sales catalogue and implement an appropriate marketing campaign to maximise market exposure and attract potential purchasers. The marketing campaign may include advertising through industry publications, specialist equipment networks, online auction platforms, direct marketing to known purchasers and other channels considered suitable for the assets being offered for sale.

The objective of the marketing process is to expose the assets to a broad and competitive market, maximise the opportunity to achieve fair market value and support a transparent and auditable disposal process.

#### **Record Generated**

- **Auction Catalogue**
- **Marketing Report**

### **Step 5 – Public Market Exposure**

An advertisement shall be placed within:

- *Inside Waste*; and/or
- other suitable industry publications.

#### **Record Generated**

- **Advertisement Record**

### **Step 5A – Auction Administration**

The auctioneer shall be responsible for administering the sale process, including managing bidder registrations, arranging asset inspections, receiving and managing bids, and ensuring compliance with the applicable conditions of sale. The auctioneer shall conduct the auction in accordance with industry standards and any directions provided by WMRC.

WMRC may establish reserve prices for individual assets or asset groups where considered appropriate, and reserves the right to withdraw assets from sale, amend

lot configurations, or decline to accept any bid that does not meet the requirements of the disposal process.

#### **Record Generated**

- **Bidder Register**
- **Auction Conditions**

### **Step 6 – Offer Receipt**

Offers (excluding Auction process) shall be submitted to:

[dicomequipment@wmrc.wa.gov.au](mailto:dicomequipment@wmrc.wa.gov.au)

Access shall be restricted to:

- Chief Executive Officer
- Projects Lead

#### **Record Generated**

- **Offer Register**

### **Step 6A – Post-Auction Review**

Following completion of the auction process, the highest conforming bid that meets or exceeds any applicable reserve price will ordinarily be accepted, subject to compliance with the conditions of sale and any requirements imposed by WMRC and the Auctioneer. Where an asset is not sold at auction, or where the auction outcome is not considered commercially acceptable, WMRC may determine an alternative disposal strategy. Such strategies may include re-auctioning the asset, entering into negotiations with interested parties, conducting a direct sale, selling the asset for scrap value, recycling the asset, or otherwise disposing of the asset in accordance with its rights under Clause 5.2 of the Demobilisation Deed.

#### **Record Generated**

- **Auction Results Report**

### **Step 7 – Offer Assessment**

Offers shall be assessed using the approved evaluation framework.

#### **Record Generated**

- **Evaluation Report**

## Step 7A – Settlement and Removal

The auctioneer shall coordinate all post-sale activities, including the collection of payments, settlement of transactions and communication with successful purchasers. The auctioneer shall also coordinate purchaser access to the site with WMRC and manage collection and removal arrangements in accordance with the conditions of sale, site access requirements and any directions issued by WMRC.

The auctioneer shall provide settlement reports and supporting documentation to WMRC to enable reconciliation of sale proceeds and confirmation that all purchaser obligations have been satisfied prior to completion of the disposal process.

### **Record Generated**

- **Settlement Statement**
- **Collection Record**

## Step 8 – Negotiation

WMRC may negotiate with any or all respondents where doing so is considered beneficial.

### **Record Generated**

- **Negotiation Record**

## Step 9 – Formal Acceptance

Successful respondents shall execute an approved Offer and Acceptance Agreement.

### **Record Generated**

- **Executed Agreement**

## Step 10 – Removal and Completion

Removal shall be monitored and verified.

### **Record Generated**

- **Asset Removal Completion Record**

## 8. Evaluation Framework

For assets sold through a public auction process, the highest conforming bid that meets or exceeds any applicable reserve price will ordinarily be accepted, subject to compliance with the conditions of sale and any requirements imposed by WMRC.

For invitation-to-offer, direct sale and negotiated sale processes, the highest monetary offer is not necessarily required to be accepted. WMRC may determine that an alternative offer represents a superior overall outcome having regard to safety, removal capability, timing, project requirements, risk reduction and overall value for money.

## 9. Probity and Conflict Management

To maintain integrity of the process:

The following persons shall not participate as purchasers:

- WMRC employees;
- Elected Members;
- project consultants involved in the disposal process;
- contractors involved in disposal management;
- immediate family members of the above;
- associated entities controlled by the above persons.

All persons involved in evaluation shall disclose actual conflicts, potential conflicts and perceived conflicts.

Conflict declarations shall be retained on the project file.

## 10. Management of Sale Proceeds

All proceeds received from disposal activities shall be managed in accordance with the Demobilisation Deed.

Appropriate financial records shall be maintained, including:

- invoices;
- receipts;
- payment confirmations;
- accounting entries; and
- supporting disposal documentation.

Where an auctioneer is engaged, sale proceeds may be received through the auctioneer's trust account arrangements and remitted to WMRC, less authorised fees and charges. Finance shall reconcile auction sales reports, settlements and remittances.

The Finance Lead shall be responsible for this process.

## 11. Treatment of Unsold Assets

Where no commercially acceptable offer is received, or where an asset remains unsold following auction, WMRC may:

- re-offer the asset;
- negotiate directly with interested parties;
- sell for scrap value;
- recycle the asset;
- include removal within a deconstruction contract; or
- otherwise dispose of the asset pursuant to Clause 5.2.

The selected approach shall consider:

- value for money;
- project timing;
- safety;
- environmental outcomes; and
- practicality.

## 12. Delegations and Direction to Staff

The Projects Lead is authorised to administer the disposal process described in this framework.

The Projects Lead may:

- coordinate consultants;
- receive and administer offers;
- arrange evaluations;
- maintain records;
- coordinate purchaser access; and
- administer disposal documentation.

Approval authority for disposal decisions under this framework rests with the Chief Executive Officer, who delegates approval authority (including acceptance of Auction bids) as follows:

| Disposal Value     | Approval Authority                         |
|--------------------|--------------------------------------------|
| <\$10,000          | Projects Lead                              |
| \$10,000-\$100,000 | CEO                                        |
| >\$100,000         | CEO following documented management review |

For disposals exceeding \$100,000 (through direct or negotiated sale), the CEO shall consider a written assessment addressing valuation, market exposure, disposal methodology, risks and compliance with this framework before approving the disposal.

The Projects Lead acting in accordance with this framework is acting under the authority of the Chief Executive Officer.

## 13. Record Keeping Requirements

The following records shall be retained:

- Asset Register
- Availability Schedule
- Purchaser Register
- Advertisements
- Invitations to Offer
- Offer Register
- Offer Submissions
- Evaluation Reports
- Negotiation Records
- Executed Agreements
- Payment Records
- Removal Records
- Conflict Declarations
- CEO Approval Records
- Maintaining timesheets for WMRC Staff directly involved in the Project

Additional records to be retained where sale has occurred via auction:

- Auctioneer appointment agreement
- Auction catalogues
- Marketing reports
- Bidder registration records
- Auction reports and results
- Settlement statements
- Remittance advices

All records shall be retained in accordance with WMRC's records management requirements.

## 14. Risk Management Considerations

Key risks include:

### **Operational Risks**

- delayed reclamation works;
- purchaser non-performance;
- impact of removal upon Recycling Centre operations;
- Inadequate auction participation resulting in reduced sale outcomes.

### **Safety Risks**

- removal activities;
- lifting operations;
- transport activities.

### **Environmental Risks**

- contamination release;
- inappropriate waste disposal.

### **Financial Risks**

- unpaid purchases;
- purchaser insolvency
- Under recovery of costs incurred by WMRC and debt owed to WMRC.

### **Reputational Risks**

- perceived favouritism;
- inadequate market testing.

The controls described within this framework are intended to mitigate these risks.

## Council Endorsement

This framework was endorsed by Council on [date] by Resolution No. [number].

The Chief Executive Officer is authorised to implement and administer this framework and to exercise the powers and responsibilities assigned under it.

**ATTACHMENT 11-5A - Progress on WMRC Resolutions as at 24 September 2026**

**Key:**        Red – resolution not yet commenced.    Orange – resolution underway.        Green – resolution complete
